WORK EXPERIENCE

Full Stack Developer
Datablooz *July 2024 - Present*

- Developed a React Native mobile application using Draftbit, focusing on innovative features and user-friendly design.
- Contributing to the development of an internal AI opportunity mapping tool using Laravel and React, delivering efficient and scalable solutions.

Full Stack Developer
Getafeel *February 2023 - Present*

- Developed an external property navigation system by integrating Angular and Laravel to provide a robust and user-friendly solution for real-time property exploration.
- Contributed to the development of an online platform that utilizes Angular and Three.js to offer interactive 3D virtual tours of properties under construction.
- Utilized Python to develop a customized plugin for 3ds Max, enhancing the 3D modeling process for the team.
- Contributed to the transformation of Getafeel's main presentation website by implementing a modern and user-friendly design.

Back End Developer
Quantox *September 2021 - February 2023*

- Continuously contributed to the enhancement and maintenance of multiple projects, harnessing the Symfony framework and working with various database management systems, including MySQL, MongoDB, Redis, Elasticsearch, and other cutting-edge technologies.
